

Pan Mixers S.A.

COMPANY PROFILE:

Pan Mixers South Africa and Reef Construction Machinery was established by its founder H. H. Ebeling in 1976, in Sebenza, east of Johannesburg. In 1982, following years of rapid growth and expansion, the factory was relocated to Jet Park in Boksburg. On these premises our unparalleled drive to service excellence, expertise and experience paved the way for continued growth making **PMSA** the largest manufacturer of concrete brick, block and paving machinery, turbine pan mixers, counter-current rapid pan mixers and counter-current planetary pan mixers, and batching plants for the concrete, refractory, foundry and ceramic industries in Africa.

In 1995 the next generation, Walter and Robert Ebeling took over at the helm of the organisation, providing a strong foundation of business and engineering expertise. Today the staff compliment exceeds 120 people consisting of commissioning and servicing teams, metal workers, engineers, C. N. C. operators, programmers and CAD design staff.

Complete projects are undertaken, from design to final erection and commissioning, encompassing mechanical, pneumatic, hydraulics and control systems, including programmable controllers. These projects can be undertaken on a full turnkey basis if required.

The company's 18,000m² factory is only a few minutes drive from the Johannesburg International Airport for immediate supply of spares worldwide. This ensures customers of assistance and creates an environment for optimum equipment efficiency as our customers can rely on **PMSA**'s enviable reputation for after-sales service.

In 1997 PMSA achieved an ISO accreditation and today **ISO 9001:2000** certification for quality management systems and standards is fully integrated. This in conjunction with our innovative design and production techniques, which are aided by **CAD/CAM** software and the latest in engineering technology from our C. N. C. machines and lathes, gives PMSA the edge in manufacture and service.

By consistently meeting the needs of our customers, we aim to remain the leading and dominant player on the African continent, whilst developing lasting partnerships through service and support, and by utilising the latest technology.

PMSA has a worldwide customer base including United Kingdom, Ireland, Taiwan, Russia, China, Poland, Australia, Mauritius, Seychelles, Madagascar, Suriname and sub-Saharan Africa.

PAN MIXERS SOUTH AFRICA has an extensive range of machinery consisting of:

- Laboratory, turbine, counter-current and planetary pan mixers (mixer capacities from 25 to 4,500 litres)
- Concrete block, brick and paving machinery (production capacities from 10,000 to 120,000 stock bricks 220 x 70 x 105 mm in a 9-hour shift)
- Complete weigh batching and aggregate handling systems
- Mixer or aggregate mounted microwave moisture sensors
- Pallet handling systems – manual, semi- and fully automated
- Product handling systems – semi- and fully automated

The highest quality standards are part of every **PMSA** delivery. Experienced project management teams will evaluate every customer’s requirements before designing, installing and commissioning the machinery, ensuring that every customer will achieve the full potential from their investment.

PMSA is the sub-Saharan distributor for several international companies such as **Eurostar** (counter-current planetary pan mixers), **Franz Ludwig** (moisture measuring systems), **SERMAC** (concrete pumps), **LeycoChem Leyde** (chemicals for concrete applications), **Finke GmbH** (pigment dosing systems), **BFS Casagrande** (concrete pipes, manholes, culverts and wet cast manufacturing), **Wil El Mil** (kerbstone presses), **Rettenmeier** (wooden production pallets for large machines), and **Fiori** (self-loading concrete mixers). **PMSA** has a close working relationship with **ABECE** (concrete roof tile machinery).
