

PMSA to celebrate 40th anniversary at Totally Concrete 2016

Pan Mixers South Africa (PMSA), manufacturer of brick, block and paving machines, will celebrate its 40th anniversary at Totally Concrete 2016, from May 9 to 11, at the Gallagher Convention Centre, in Midrand.

As part of its automated brick, block and paving manufacturing equipment, PMSA also offers locally-developed automation and handling systems for large-scale brick and block plants to increase productivity and improve the end quality of the final products.

“We have been building on our technology, leadership, expertise and experience in the concrete products sector for the past 40 years and have an array of options to suit all client needs without compromising on end product quality,” MD Walter Ebeling comments.

An example of PMSA’s ongoing product development is its new Eco range of automated handling systems, which will be officially unveiled at Totally Concrete 2016. This latest technology gives customers the option of automated handling plants at a far more affordable price compared to the more costly top-of-the-range systems. The new range of handling systems includes forklift options as opposed to more conventional but higher-cost finger and transfer car systems.

PMSA will use Totally Concrete 2016 as a showcase to launch various new products, including a new range of vibrators for its entire range of brick-and-block machinery. These vibrators are subject to arduous working conditions and resultant high fatigue, which reduces the lifespan of the bearings.

“Our new vibrators, all designed and built locally, will be sealed units with a three-

year lifespan, thus enabling us to offer an extended warranty on our manufacturing equipment,” says Quintin Booysen, sales and marketing manager at PMSA. **BA**

PMSA will use Totally Concrete 2016 as a platform to launch a range of new products and technologies.
