

### Contractors can polish up on their concrete floor expertise at seminar

Internationally recognised floor grinding and polishing machinery expert HTC will be hosting a specialised seminar that focuses on product training, technology and trends in the local polished concrete industry.

The workshop, taking place on March 17 and 18, 2014, will be hosted onsite by Pan Mixers South Africa (PMSA) at their showroom and sales facility in Jet Park, Boksburg. Superb Flooring Systems, part of the PMSA group of companies, is the exclusive local distributor of the HTC range of grinding and polishing machines and Twister floor pads.

Superb Flooring Systems manager for Southern Africa, Andreas Hasselmoose, states that the workshop will feature an in-depth tutorial

on the advantages of SuperFloor – an innovative concept that involves the use of the HTC range of floor grinding machines and diamond tools to grind and polish concrete floors, to remove the surface paste and expose the stronger concrete beneath, bringing the floor to a high shine.

“The result of this process is a stronger, more durable, shiny and beautiful polished concrete floor”, he explains.

PMSA marketing and sales manager, Quintin Booysen, believes that these types of industry-specific seminars are becoming increasingly important for clients in Africa.

According to Hasselmoose, polished concrete flooring is a growing trend worldwide.

“The use of polished concrete has increased in retail markets, the food and clothing sectors, as well as in industrial, warehousing and residential markets. It is a growing market and people in industry need to be informed about the benefits of polished concrete and how it is achieved and maintained.”

The HTC seminar takes place at the PMSA showroom and sales facility in Jet Park, Boksburg, and will be divided into a theory-based morning session, and a practical afternoon session featuring product displays and actual hands-on grinding and polishing. The event caters for a maximum of 17 people, who will be accepted on a first come, first served basis.
