

Steel components for brick machines

A preferential supply agreement has been reached between TWR Steel Services, specialists in steel cutting technology and Pan Mixers South Africa, a supplier of concrete brick, block and paving-making machinery and technology. In this way, TWR Steel Services and Pan Mixers SA, both in Boksburg, Gauteng, have improved control over the supply chain of critical steel.

TWR Steel Services has five technologically advanced machines for laser, plasma and oxy-fuel cutting of steel products, as well as computer numerically-controlled rolling and bending, in its 2 800 m² manufacturing facility.
