

A rock-solid offering

NEW!

Benefits to the industry:

Pan Mixers South Africa's (PMSA) Basalt Technology has launched StoneRod, a superior concrete reinforcing product, made from crushed and melted basalt rock. It is a cost-effective alternative to industry-standard steel and E-glass concrete reinforcement for numerous industrial applications.

Sustainability: StoneRod is more environmentally-friendly than steel or glass. It is 100 percent natural lava rock, and significantly reduces the carbon footprint. [mmpr](#)
