BOARD ACCUMULATORS AND TREATMENT

Product and Production Board Handling System

TECHNICAL SPECIFICATION SHEET:

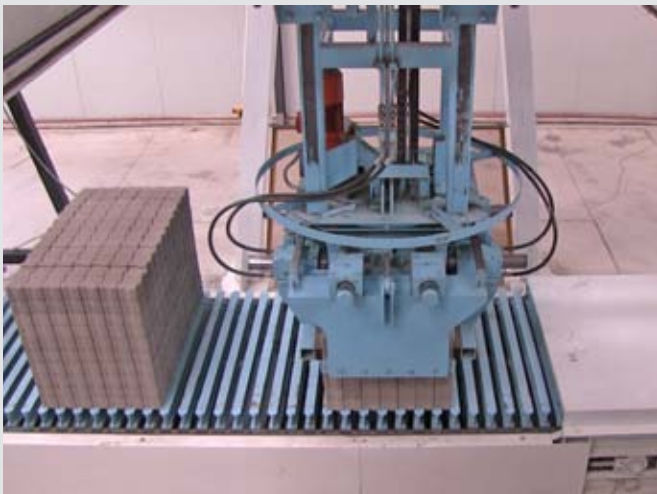

SUMMARY

PMSA provides a full range of production board accumulator and treatment options which form part of the production board handling system.

Production boards returning to the production cycle should be cleaned and maintained to ensure longevity and improve end product quality. This includes production board return systems, board cleaning and maintenance, and board accumulation and storage before they are returned to the brick, block and paver making machine.

ACCUMULATOR AND TREATMENT ITEMS INCLUDE:

- **Return chain conveyor systems:**
 - Hydraulic indexing for precise board placement.
 - Block pusher for separating the cured product from the board.
 - Product accumulator to remove products from boards and speed up packing.
- **Board brushing and cleaning:**
 - Nylon bristle brushing for wooden production boards.
 - Wire bristle brushing for steel production boards.
- **Board spraying systems for treatment and easy end product release.**
- **Board turning to use both sides of the production board.**
- **Production board accumulators and storage:**
 - Manual vacuum swing-arm for packing and unpacking of boards.
 - Automated accumulator and de-accumulator for packing and unpacking of boards.
 - Walking beam for movement and storage of board packs.
 - Automated board storage and buffering systems.
- **Production board magazines are included on certain brick, block and paver making machines.**
