

CONCRETE FLOOR SEMINAR

A SPECIALISED TRAINING AND WORKSHOP SESSION THAT FOCUSES SPECIFICALLY ON PRODUCT TRAINING, TECHNOLOGY AND TRENDS IN THE LOCAL POLISHED CONCRETE INDUSTRY IS TAKING PLACE ON 17 AND 18 MARCH 2014, AND WILL BE HOSTED ONSITE BY PAN MIXERS SOUTH AFRICA (PMSA). PMSA SUPPLIES A COMPREHENSIVE RANGE OF CONCRETE EQUIPMENT INCLUDING CONCRETE BRICK, BLOCK AND PAVING-MAKING MACHINERY AND TECHNOLOGY IN AFRICA AS WELL AS HTC EQUIPMENT THROUGH SUPERB FLOORING SYSTEMS.

Andreas Hasselmoose, manager for Southern Africa of Superb Flooring Systems which is part of the PMSA group of companies, states that the workshop will feature an in-depth tutorial on the advantages of HTC Superfloor. This is an innovative concept that involves the use of the HTC range of floor grinding machines and diamond tools to grind and polish concrete floors in order to remove the surface paste and expose the stronger concrete beneath, while bringing the floor to a high shine.

"Another major benefit of the HTC workshop is that it will also examine the correct selection of tooling," he explains.

Superb Flooring Systems is the exclusive local distributor of the HTC range of grinding and polishing machines and Twister floor pads.

PMSA marketing and sales manager Quintin Booysen believes that these types of industry-specific seminars are becoming increasingly important for clients in Africa. "These workshop sessions not only focus on equipment but on the solution as a whole, and the latest concrete equipment technology," he notes.

The HTC seminar takes place at the PMSA showroom and sales facility in Jet Park, Boksburg, and will be divided into a theory-based morning session, and

a practical afternoon session featuring product displays and actual hands-on grinding and polishing.

The event caters for a maximum of 17 people, who will be accepted on a first-come, first-served basis. For more information on the seminar email Vannesa@panmixers.co.za or call 011 578 8700. ■
